Work Experience

(Jan 2017 - Present) **Full Stack Software Developer – I-nexus**

- Working with an enterprise code base with over 1M LOC.
- Developing Typescript and Java code for I-Nexus using both our bespoke framework and writing greenfield projects in React/GraphQL.
- Using Node.js to configure and serve the React app.
- Resolving Customer Service Requests (customer reported issues) using Salesforce.
- Writing automated unit, integration and selenium tests. Writing BDD tests using Cypress and Gherkin.
- Developing with SCRUM and Agile software development methodologies. Attending daily stand-ups and sprint planning meetings.
- Managing Docker containers on staging infrastructure using Portainer and maintaining Docker deployment scripts.
- Working with Spring, Hibernate, Typescript, Java, Node, React, MySQL, Docker.

Education

(2008–2012) **De Montfort University (Leicester) - BSc Computer Science**

(2001–2006) **Beauchamp College (Oadby, Leicester)**

English – C
Maths – C
GCSE ICT – C
AVCE ICT – B
Science - D
GNVQ Business Studies - Merit

Richard is hidden gem that i-nexus found over 3.5 years ago. Rich is without a doubt an extremely talented developer. I had the opportunity to work with him at i-nexus as a fellow developer. He is definitely one of those people that likes a challenge and dives head first into a problem. I've lost count of the number of times, he has resolved CSRs (customer service requests) that most devs would steer clear of or the times, when he has prototyped ideas immediately after meetings. He definitely likes to keep occupied and with the speed at which he does things, there is little that won't be done. It has been a privilege and a pleasure to work with you, Rich. I hope we get to work together again sometime.

- Binu Manoharan — Java Developer — I-Nexus
